Summary

Software Engineer specializing in DevOps and Observability with 2 years of experience managing CI/CD pipelines, production deployments and distributed system monitoring. Skilled in automation workflows, log pipelines and improving system reliability and observability. Focused on enhancing deployment efficiency and operational stability through collaboration with cross-functional teams.

Technical Skills

- **DevOps & Automation:** GitHub, GitHub Actions, Jenkins, Docker, Kubernetes, Argo CD
- **Observability & Monitoring:** Splunk, Elasticsearch, Logstash, Kibana, AppDynamics, Grafana
- **Log Pipeline & Ingestion:** Vector, Splunk Universal, forwarder, Filebeat, HEC, TCP inputs, Java agent
- **Cloud & Infrastructure:** AWS, Microsoft Azure, Red Hat OpenShift, Linux
- **ITSM & Incident Management:** ServiceNow, Jira

Experience

Software Engineer, LTIMindtree – Chennai, India

April 2024 – Present

DevOps:

- Designed and maintained end-to-end CI/CD pipelines using **GitHub**, **GitHub Actions** and **Jenkins** to automate code integration, testing, container image builds and application deployments across DEV, UAT and PROD environments.
- Containerized enterprise applications using **Docker** and deployed workloads on **Kubernetes (K8s)** implementing rolling updates, health probes, autoscaling and resource optimization.
- Implemented GitOps-based deployment strategies using **Argo CD**, enabling automated application synchronization, environment promotion, configuration drift detection and controlled release management across Kubernetes clusters.
- Built and optimized application delivery workflows by integrating source control repositories, build automation, artifact management, container registries and deployment pipelines to improve release efficiency and reliability.

Observability & Monitoring:

- Maintained **Splunk** platforms, including Universal Forwarders, Heavy Forwarders, HEC inputs, index configurations, version upgrades and platform lifecycle management.
- Managed and optimized the **ELK Stack (Elasticsearch, Logstash, Kibana)** by tuning ingestion pipelines, index lifecycle policies, shard allocation strategies and cluster performance for large-scale log analytics.
- Configured and Supported **AppDynamics** controllers and machine agents, implementing health rules, business transaction monitoring, dynamic baselines and SLA-driven alerting for application performance management.
- Designed and maintained **Grafana** dashboards by integrating data sources such as **Prometheus**, **MongoDB** and **MSSQL**, delivering real-time infrastructure and application observability.
- Delivered centralized observability across **Kubernetes** and **OpenShift** environments by aggregating metrics, logs, traces and events into unified monitoring and visualization platforms, reducing MTTR and improving operational efficiency.

DevOps Intern, LTIMindtree

Feb 2023 – June 2023

- Trained in **Linux** (Red Hat, Ubuntu) and **ITIL** practices including incident and change management.
- Gained hands-on experience in **AWS services** (EC2, IAM, S3, EKS), **Java** and Infrastructure as Code using **Terraform**.
- Learned log ingestion, parsing and monitoring fundamentals while simulating root cause analysis using observability tools.
- Completed IGNITE Cloud Track with an assessment score of **86%**.

Key Projects

- **Azure DevOps Board Automator:** Python tool using Azure API to automate backlog management.
- **Logstash OOM Recovery:** Scripted automated deletion of heap dumps and service restarts.
- **Automated Splunk Pipeline:** Built a CI/CD flow to route Python application logs to Splunk via HEC.

Certifications & Courses

- **Microsoft Certified:** Azure Administrator Associate (AZ-104), Azure Fundamentals (AZ-900)
- **Oracle Certified:** Oracle Cloud Infrastructure (OCI) Fundamentals
- **Courses:** Cloud Computing and AWS Fundamentals course, Udemy
- **Certification:** Splunk Enterprise Certified Administrator, Udemy

Education

Panimalar Institute of Technology, B.E. Electronics and Communication Engineering Aug 2019 – May 2023

- CGPA: 8.98/10

Awards

- **Super Crew Spot Award (LTIMindtree):** Recognized two consecutive years (2024, 2025) for outstanding contributions to platform reliability, stability, and engineering excellence
- **Recognition Badges (LTIMindtree):** Awarded **Accountability** and **Problem Solver** for effective issue resolution and ownership.
